Is your organization in compliance with the OSHA Standard?

OSHA requires employers to safeguard employees who have a reasonably anticipated occupational exposure to blood or other potentially infectious materials. Without proper preparation in blood diseases and airborne pathogens, lives could be adversely impacted or even lost.

The NSC Bloodborne and Airborne Pathogens course helps reduce these risks by focusing on how to protect employees from blood and airborne pathogens and what to do if an exposure occurs.

Students will Learn :

- ✓ The fundamentals of bloodborne pathogens training
- ✓ Essential information on hepatitis viruses and HIV
- ✓ How to prevent infection from bloodborne pathogens
- ✓ Key facts about airborne pathogens including tuberculosis

Course Content:

- ✓ The entire text of the OSHA standard and glossary of terms to help understand it
- ✓ A thorough introduction to bloodborne and airborne pathogens, including Hepatitis B, Hepatitis C, HIV and TB
- ✓ Proven steps to reduce exposure risks and prevent infection
- ✓ Action to take if an exposure occurs
- ✓ The Needle Stick Safety and Prevention Act
- ✓ Recordkeeping and exposure control plans

Course Materials

Instructor Resource Kit

- Instructor Manual with lesson plans, exams and additional scenarios for class discussions
- Instructor CD with PowerPoint presentation
- DVD
- USB with all DVD and CD content
- Student Workbook

Student Workbook

- Nationally recognized course includes student completion card.
- Available as an eBook
